2027 考研英语二强化完型讲义

主讲老师：柴荣

目 录

一、大纲解读.....	1
二、历年真题.....	1
三、题型分类.....	2
四、做题技巧.....	2
A 搭配知识.....	3
B 逻辑关系.....	5
C 语义一致.....	9
五、做题步骤.....	12
六、真题讲解.....	12
七、参考答案.....	36

一、大纲解读 (2026)

该部分考查考生在具体语境中综合运用语言知识的能力。共 20 小题，每题 0.5 分，共 10 分。

在一篇约 350 词的文章中留出 20 个空白，要求考生从每题所给的 4 个选项中选出最佳选项填入空白，使填补后的文章语句通顺、意义连贯。

二、历年真题

英二 完型				
年份	体裁	题材	主题	平均分
2010	记叙文	社会生活	甲型 H1N1 流感的爆发和防空	/
2011	议论文	社会生活	提供网络安全保障的措施	/
2012	说明文	政治历史	美国大兵 G. I. Joe 的形象	/
2013	议论文	社会生活	电子支付时代不会很快到来	4.96
2014	议论文	社会生活	对肥胖的新研究	4.41
2015	议论文	社会生活	放下手机与陌生人交流	4.81
2016	议论文	社会生活	城市幸福指数影响公司长远投资	4.75
2017	议论文	社会生活	无工作的世界未必那么糟糕	4.42
2018	议论文	科普知识	好奇心未必有益	5.06
2019	议论文	社会生活	正确的称重方式	5.24
2020	议论文	社会生活	做个耐心的家长	4.88
2021	议论文	社会生活	如何设定目标	4.41
2022	议论文	社会生活	作家如何找到写作时间	/
2023	议论文	社会生活	小型企业如何实现团队增长	/
2024	议论文	社会生活	如何平衡社交生活	/
2025	议论文	社会生活	如何在需要帮助时开口求助	/
2026	议论文	社会生活	心理健康与认知误区	/
平均值				4.77

三、题型分类

- 词汇辨析题
- 短语搭配题
- 逻辑关系题
- 个人造化题

四、做题技巧

1.保命技巧

- 概率原则

AAAAA AAAAA AAAAA AAAAA

BBBBB BBBB BBBB BBBB

CCCCC CCCCC CCCCC CCCCC

DDDDD DDDDD DDDDD DDDDD

这样选可以得多少分? $5 \times 0.5 \neq 2.5$ 分 = 3 分

- 红花绿叶原则

“红花词”：

however, although, yet, while, even, because, for example

“绿叶词”：

like, except, provided, supposing, since, now that, thus, hence,

in case=lest=for fear that, if only= I wish, or else, unless, anyway/anyhow,
nevertheless, nonetheless

注：优先选择红花词，后带入文中检查逻辑。

2.高分技巧

A.利用搭配知识解题

B.利用逻辑关系解题

C.利用语义一致解题

A.利用搭配知识解题 (介词)

固定搭配 → 积累背诵

例 1: 【英二 2013】

The 18 of this type of fraud is no easy task, and a new field of computer science is developing to 19 security issues.

19. [A] cope with [B] fight against [C] adapt to [D] call for

例 2: 【英二 2011】

Last month, Howard Schmidt, the nation's cyber-czar, offered the federal government a 4 to make the Web a safer place—a “voluntary trusted identity” system that would be the high-tech 5 of a physical key, a fingerprint and a photo ID card, all rolled 6 one.

6.[A] by [B] into [C] from [D] over

例 3: 【英二 2011】

Mr. Schmidt described it as a “voluntary ecosystem” in which “individuals and organizations can complete online transactions with 14, trusting the identities of each other and the identities of the infrastructure 15 which the transaction runs”.

15.[A] on [B] after [C] beyond [D] across

例 4: 【英二 2011】

The Internet affords anonymity to its users, a blessing to privacy and freedom of speech. But that very anonymity is also behind the explosion of cyber-crime that has 1 across the Web.

1. [A] swept [B] skipped [C] walked [D] ridden

例 5: 【英二 2014】

Stereotypes 16 with obesity include laziness, lack of will power, and lower prospects for success.

16. [A] compared [B] combined [C] settled [D] associated

例 6: 【英二 2015】

Strangers are inherently 8 to us, so we are more likely to feel 9 when communicating with them compared with our friends and acquaintances. To avoid this uneasiness, we 10 to our phones. “Phones become our security blanket,” Wortmann says.

10. [A] attend [B] point [C] take [D] turn

B.利用逻辑关系解题

● 顺接关系

1.并列词

and, and also, or, either...or..., neither...nor..., not only...but also...,
likewise, similarly, equally, in the same way, that is (to say), as well as,
much the same as; on the one hand...on the other hand; for one thing... for
another; one...another; some... others.. still others...

2.递进词

also, then, besides, additionally, in addition, furthermore, moreover,
what's more, indeed, even, in effect, in fact

● 相反关系

1.转折词

but, however, yet, contrarily, on the contrary, by contrast, unfortunately,
in fact, in reality, actually, on the other hand

2.让步词

although, though, even though, even if, nevertheless, despite, in spite of,
regardless of, anyway, anyhow, even

3.对比词

while, whereas, rather than..., instead of, not...but...

● 因果关系

1.因果词

because, for, since, as, thus, hence, therefore, so, so..that..., such...that...,
consequently, accordingly, due to, thanks to, on account of, account for,
considering, seeing that, in that, now that, as a result, for this reason

2.目的词

in order that..., for, in order to, so that, lest, for fear that, in case

3.条件词

if, only if, unless, otherwise, as soon as, as long as, in case, suppose that,
supposing that, provided that, providing that, with (the help of), when,
whenever

● 举例关系

such as, for example, for instance, of(these, those, them), among(these, those, them), to illustrate, as an illustration, to take an example, more specifically speaking, namely

● 时间关系

1.first, second, last of all; in the first place, in the second place, finally; to begin with, to continue; first...then (顺序递进/先后罗列)

2.when, whenever, before, after, since, as, until, till, simultaneously, meanwhile, in the meantime, at the same time

例 1: 【英二 2012】

This was not a volunteer soldier, not someone well paid,___5___an average guy, up___6___the best trained, best equipped, fiercest, most brutal enemies seen in centuries.

5. [A] and [B] nor [C] but [D] hence

例 2: 【英二 2013】

Given the advantages of electronic money, you might think that we would move quickly to the cashless society in which all payments are made electronically.___1___, a true cashless society is probably not around the corner.

1. [A] However [B] Moreover [C] Therefore [D] Otherwise

例 3: 【英二 2013】

Third, the use of paper checks gives consumers several days of “float”—it takes several days____11____a check is cashed and funds are 12__from the issuer’s account, which means that the writer of the check can earn interest on the funds in the meantime.____13____electronic payments are immediate, they eliminate the float for the consumer.

11.[A] before [B] after [C] since [D] when

13.[A] Unless [B] Until [C] Because [D] Though

例 4: 【英二 2014】

For example, heavier women are less likely to develop calcium deficiency than thin women.____3____, among the elderly, being somewhat overweight is often an____4____of good health.

3.[A] Instead [B] However [C] Likewise [D] Therefore

例 5: 【英二 2010】

But the epidemic is “__4__” in severity, according to Margaret Chan, the organization’s director general, __5__the overwhelming majority of patients experiencing only mild symptoms and a full recovery, often in the__6__of any medical treatment.

6.[A] progress [B] absence [C] presence [D] favor

例 6: 【英二 2012】

To the men and women who ___1___ in World War II and the people they liberated, the G.I. was the ___2___ man grown into hero, the pool farm kid torn away from his home, the guy who ___3___ all the burdens of battle, who slept in cold foxholes, who went without the ___4___ of food and shelter, who stuck it out and drove back the Nazi reign of murder.

4. [A] necessities [B] facilities [C] commodities [D] properties

C. 利用语义一致解题

例 1: 【英二 2016】

P1: The relationship was ___15___ stronger in places where happiness was spread more ___16___. Firms seem to invest more in places where most people are relatively happy, rather than in places with happiness inequality.

16. A. rapidly B. regularly C. directly D. equally

例 2: 【英二 2011】

...the approach would create a “walled garden” in cyberspace, with safe “neighborhoods” and bright “streetlights” to establish a sense of a ___13___ community.

13. [A] trusted [B] modernized [C] thriving [D] competing

例 3: 【英二 2012】

To the men and women who 1 in World War II and the people they liberated, the G.I. was the 2 man grown into hero, the poor farm kid torn away from his home,...This was not a volunteer soldier, not someone well paid, 5 an average guy, up 6 the best trained, best equipped, fiercest, most brutal enemies seen in centuries.

2. [A] actual [B] common [C] special [D] normal

例 4: 【英二 2014】

Today we have a (an) 14 to label obesity as a disgrace. The overweight are sometimes 15 in the media with their faces covered. Stereotypes 16 with obesity include laziness, lack of will power, and lower prospects for success. Teachers, employers, and health professionals have been shown to harbor biases against the obese. 17 very young children tend to look down on the overweight, and teasing about body build has long been a problem in schools.

14. [A] option [B] reason [C] opportunity [D] tendency

例 5: 【英二 2015】

P2: It's a sad reality—our desire to avoid interacting with other human beings—because there's 2 to be gained from talking to the stranger

standing by you...

P6: In one 2011 experiment, behavioral scientists Nicholas Epley and Juliana Schroeder asked commuters to do the unthinkable: Start a 13.

They had Chicago train commuters talk to their fellow 14.

14.[A]trainees [B]employees [C] researchers [D] passengers

例 6: 【英二 2018】

P1: Why do people read negative Internet comments and do other things that will obviously be painful? Because humans have an inherent need to 1 uncertainty, according to a recent study in Psychological Science.

The new research reveals that the need to know is so strong that people will 2 to satisfy their curiosity even when it is clear the answer will 3.

.....

P4: The drive to 10 is deeply rooted in humans, much the same as the basic drives for 11 or shelter, says Christopher Hsee of the University of Chicago. Curiosity is often considered a good instinct-it can 12 new scientific advances, for instance-but sometimes such 13 can backfire. The insight that curiosity can drive you to do 14 things is a profound one.

10. A. disagree B. forgive C. discover D. forget

13. A. inquiry B. withdrawal C. persistence D. diligence

五、做题步骤

- 1.读首句，明确主题（注意二句转折）
- 2.串读段落，掌握大意
- 3.瞻前顾后，先易后难（逻辑关系+语义一致）
- 4.重读全文，核对检查

六、真题讲解

2010

The outbreak of swine flu that was first detected in Mexico was declared a global epidemic on June 11, 2009. It is the first worldwide epidemic__1__ by the World Health Organization in 41 years.

The heightened alert __2__ an emergency meeting with flu experts in Geneva that assembled after a sharp rise in cases in Australia, and rising__3__ in Britain, Japan, Chile and elsewhere.

But the epidemic is “__4__” in severity, according to Margaret Chan, the organization's director general, __5__the overwhelming majority of patients experiencing only mild symptoms and a full recovery, often in the __6__ of any medical treatment.

The outbreak came to global__7__in late April 2009, when Mexican authorities noticed an unusually large number of hospitalizations and deaths__8__ healthy adults. As much of Mexico City shut down at the height of a panic, cases began to __9__in New York City, the southwestern United States and around the world.

In the United States, new cases seemed to fade__10__warmer weather arrived. But in late September 2009, officials reported there was __11__flu activity in almost every state and that virtually all the__12__tested are the new swine flu, also known as (A) H1N1, not seasonal flu. In the U.S., it has__13__more than one million people, and caused more than 600 deaths and more than 6,000 hospitalizations.

Federal health officials__14__Tamiflu for children from the national stockpile and began__15__orders from the states for the new swine flu vaccine. The new vaccine, which is different from the annual flu vaccine, is __16__ ahead of expectations. More than three million doses were to be made available in early October 2009, though most of those __17__doses were of the FluMist nasal spray type, which is not__18__for pregnant women, people over 50 or those with breathing difficulties, heart disease or several other __19__. But it was still possible to vaccinate people in other high-risk group: health care workers, people __20__infants and healthy young people.

2011

The Internet affords anonymity to its users, a blessing to privacy and freedom of speech. But that very anonymity is also behind the explosion of cyber-crime that has 1 across the Web.

Can privacy be preserved 2 bringing safety and security to a world that seems increasingly 3?

Last month, Howard Schmidt, the nation's cyber-czar, offered the federal government a 4 to make the Web a safer place—a “voluntary trusted identity” system that would be the high-tech 5 of a physical key, a fingerprint and a photo ID card, all rolled 6 one. The system might use a smart identity card, or a digital credential 7 to a specific computer, and would authenticate users at a range of online services.

The idea is to 8 a federation of private online identity systems. User could 9 which system to join, and only registered users whose identities have been authenticated could navigate those systems. The approach contrasts with one that would require an Internet driver's license 10 by the government.

Google and Microsoft are among companies that already have these “single sign-on” systems that make it possible for users to 11 just once but use many different services.

12 the approach would create a “walled garden” in cyberspace, with safe “neighborhoods” and bright “streetlights” to establish a sense of a 13 community.

Mr. Schmidt described it as a “voluntary ecosystem” in which “individuals and organizations can complete online transactions with 14, trusting the identities of each other and the identities of the infrastructure 15 which the transaction runs”.

Still, the administration's plan has 16 privacy rights activists. Some applaud the approach; others are concerned. It seems clear that such a scheme is an initiative push toward what would 17 be a compulsory Internet “driver's license” mentality.

The plan has also been greeted with 18 by some computer security experts, who worry that the “voluntary ecosystem” envisioned by Mr. Schmidt would still

leave much of the Internet 19. They argue that all Internet users should be 20 to register and identify themselves, in the same way that drivers must be licensed to drive on public roads.

2012

Millions of Americans and foreigners see G.I. Joe as a mindless war toy, the symbol of American military adventurism, but that's not how it used to be. To the men and women who 1 in World War II and the people they liberated, the G.I. was the 2 man grown into hero, the poor farm kid torn away from his home, the guy who 3 all the burdens of battle, who slept in cold foxholes, who went without the 4 of food and shelter, who stuck it out and drove back the Nazi reign of murder. This was not a volunteer soldier, not someone well paid, 5 an average guy, up 6 the best trained, best equipped, fiercest, most brutal enemies seen in centuries.

His name is not much. G.I. is just a military abbreviation 7 Government Issue, and it was on all of the article 8 to soldiers. And Joe? A common name for a guy who never 9 it to the top. Joe Blow, Joe Magrac... a working class name. The United States has 10 had a president or vice president or secretary of state Joe.

I. Joe had a 11 career fighting German, Japanese, and Korean troops. He appears as a character, or a 12 of American personalities, in the 1945 movie The Story of G.I. Joe, based on the last days of war correspondent Ernie Pyle. Some of the soldiers Pyle 13 portrayed themselves in the film. Pyle was famous for covering the 14 side of the war, writing about the dirt-snow-and-mud soldiers, not how many miles were 15 or what towns were captured or liberated. His reports 16 the "Willie" cartoons of famed Stars and Stripes artist Bill Maulden. Both men 17 the dirt and exhaustion of war, the 18 of civilization that the soldiers shared with each other and the civilians: coffee, tobacco, whiskey, shelter, sleep. 19 Egypt, France, and a dozen more countries, G. I. Joe was any American soldier, 20 the most important person in their lives.

1.[A] performed	[B] served	[C] rebelled	[D] betrayed
2.[A] actual	[B] common	[C] special	[D] normal
3.[A] bore	[B] eased	[C] removed	[D] loaded
4.[A] necessities	[B] facilities	[C] commodities	[D] properties
5.[A] and	[B] nor	[C] but	[D] hence
6.[A] for	[B] into	[C] from	[D] against
7.[A] meaning	[B] implying	[C] symbolizing	[D] claiming
8.[A] handed out	[B] turn over	[C] brought back	[D] passed down
9.[A] pushed	[B] got	[C] made	[D] managed
10.[A] ever	[B] never	[C] either	[D] neither
11.[A] disguised	[B] disturbed	[C] disputed	[D] distinguished
12.[A] company	[B] collection	[C] community	[D] colony
13.[A] employed	[B] appointed	[C] interviewed	[D] questioned
14.[A] ethical	[B] military	[C] political	[D] human
15.[A] ruined	[B] commuted	[C] patrolled	[D] gained
16.[A] paralleled	[B] counteracted	[C] duplicated	[D] contradicted
17.[A] neglected	[B] avoided	[C] emphasized	[D] admired
18.[A] stages	[B] illusions	[C] fragments	[D] advances
19.[A] With	[B] To	[C] Among	[D] Beyond
20.[A] on the contrary	[B] by this means	[C] from the outset	[D] at that point

2013

Given the advantages of electronic money, you might think that we would move quickly to the cashless society in which all payments are made electronically. ___1___, a true cashless society is probably not around the corner. Indeed, predictions of such a society have been ___2___ for two decades but have not yet come to fruition. For example, *Business Week* predicted in 1975 that electronic means of payment would soon “revolutionize the very ___3___ of money itself,” only to ___4___ itself several years later. Why has the movement to a cashless society been so ___5___ in coming?

Although electronic means of payment may be more efficient than a payments system based on paper, several factors work ___6___ the disappearance of the paper system. First, it is very ___7___ to set up the computer, card reader, and telecommunications networks necessary to make electronic money the ___8___ form of payment. Second, paper checks have the advantage that they ___9___ receipts, something that many consumers are unwilling to ___10___. Third, the use of paper checks gives consumers several days of “float”—it takes several days ___11___ a check is cashed and funds are ___12___ from the issuer’s account, which means that the writer of the check can earn interest on the funds in the meantime. ___13___ electronic payments are immediate, they eliminate the float for the consumer.

Fourth, electronic means of payment may ___14___ security and privacy concerns. We often hear media reports that an unauthorized hacker has been able to access a computer database and to alter information ___15___ there. The fact that this is not an ___16___ occurrence means that dishonest persons might be able to access bank accounts in electronic payments systems and ___17___ from someone else’s accounts. The ___18___ of this type of fraud is no easy task, and a new field of computer science is developing to ___19___ security issues. A further concern is that the use of electronic means of payment leaves an electronic ___20___ that contains a large amount of personal data. There are concerns that government, employers, and marketers might be able to access these data, thereby violating our privacy.

1.[A] However	[B] Moreover	[C] Therefore	[D] Otherwise
2.[A] off	[B] back	[C] over	[D] around
3.[A] power	[B] concept	[C] history	[D] role
4.[A] reward	[B] resist	[C] resume	[D] reverse
5.[A] silent	[B] sudden	[C] slow	[D] steady
6.[A] for	[B] against	[C] with	[D] on
7.[A] imaginative	[B] expensive	[C] sensitive	[D] productive
8.[A] similar	[B] original	[C] temporary	[D] dominant
9.[A] collect	[B] provide	[C] copy	[D] print
10.[A] give up	[B] take over	[C] bring back	[D] pass down
11.[A] before	[B] after	[C] since	[D] when
12.[A] kept	[B] borrowed	[C] released	[D] withdrawn
13.[A] Unless	[B] Until	[C] Because	[D] Though
14.[A] hide	[B] express	[C] raise	[D] ease
15.[A] analyzed	[B] shared	[C] stored	[D] displayed
16.[A] unsafe	[B] unnatural	[C] uncommon	[D] unclear
17.[A] steal	[B] choose	[C] benefit	[D] return
18.[A] consideration	[B] prevention	[C] manipulation	[D] justification
19.[A] cope with	[B] fight against	[C] adapt to	[D] call for
20.[A] chunk	[B] chip	[C] path	[D] trail

2014

Thinner isn't always better. A number of studies have __1__ that normal-weight people are in fact at higher risk of some diseases compared to those who are overweight. And there are health conditions for which being overweight is actually __2__. For example, heavier women are less likely to develop calcium deficiency than thin women. __3__, among the elderly, being somewhat overweight is often an __4__ of good health.

Of even greater __5__ is the fact that obesity turns out to be very difficult to define. It is often defined __6__ body mass index, or BMI. BMI __7__ body mass divided by the square of height. An adult with a BMI of 18 to 25 is often considered to be normal weight. Between 25 and 30 is overweight. And over 30 is considered obese. Obesity, __8__, can be divided into moderately obese, severely obese, and very severely obese.

While such numerical standards seem __9__, they are not. Obesity is probably less a matter of weight than body fat. Some people with a high BMI are in fact extremely fit, __10__ others with a low BMI may be in poor __11__. For example, many collegiate and professional football players __12__ as obese, though their percentage body fat is low. Conversely, someone with a small frame may have high body fat but a __13__ BMI.

Today we have a (an) __14__ to label obesity as a disgrace. The overweight are sometimes __15__ in the media with their faces covered. Stereotypes __16__ with obesity include laziness, lack of will power, and lower prospects for success. Teachers, employers, and health professionals have been shown to harbor biases against the obese. __17__ very young children tend to look down on the overweight, and teasing about body build has long been a problem in schools.

Negative attitudes toward obesity, __18__ in health concerns, have stimulated a number of anti-obesity __19__. My own hospital system has banned sugary drinks from its facilities. Many employers have instituted weight loss and fitness initiatives. Michelle Obama launched a high-visibility campaign __20__ childhood obesity, even

claiming that it represents our greatest national security threat.

2015

In our contemporary culture, the prospect of communicating with — or even looking at—a stranger is virtually unbearable. Everyone around us seems to agree by the way they cling to their phones, even without a 1 on a subway.

It's a sad reality—our desire to avoid interacting with other human beings—because there's 2 to be gained from talking to the stranger standing by you. But you wouldn't know it, 3 into your phone. This universal protection sends the 4: “Please don't approach me.”

What is it that makes us feel we need to hide 5 our screens?

One answer is fear, according to Jon Wortmann, an executive mental coach. We fear rejection, or that our innocent social advances will be 6 as “weird.” We fear we'll be 7. We fear we'll be disruptive.

Strangers are inherently 8 to us, so we are more likely to feel 9 when communicating with them compared with our friends and acquaintances. To avoid this uneasiness, we 10 to our phones. “Phones become our security blanket,” Wortmann says. “They are our happy glasses that protect us from what we perceive is going to be more 11.”

But once we rip off the band-aid, tuck our smartphones in our pockets and look up, it doesn't 12 so bad. In one 2011 experiment, behavioral scientists Nicholas Epley and Juliana Schroeder asked commuters to do the unthinkable: Start a 13. They had Chicago train commuters talk to their fellow 14. “When Dr. Epley and Ms. Schroeder asked other people in the same train station to 15 how they would feel after talking to a stranger, the commuters thought their 16 would be more pleasant if they sat on their own,” The *New York Times* summarizes. Though the participants didn't expect a positive experience, after they 17 with the experiment, “not a single person reported having been embarrassed.”

18, these commutes were reportedly more enjoyable compared with those without communication, which makes absolute sense, 19 human beings thrive off of social connections. It's that 20: Talking to strangers can make you feel

connected.

2016

Happy people work differently. They're more productive, more creative, and willing to take greater risks. And a new research suggests that happiness might influence 1 firms work, too.

Companies located in places with happier people invest more, according to a recent research paper. 2, firms in happy places spend more on R&D (research and development). That's because happiness is linked to the kind of longer-term thinking 3 for making investments for the future.

The researchers wanted to know if the 4 and inclination for risk-taking that come with happiness would 5 the way companies invested. So they compared U.S. cities' average happiness 6 by Gallup polling with the investment activity of publicly traded firms in those areas.

7 enough, firms' investment and R&D intensity were correlated with the happiness of the area in which they were 8. But is it really happiness that's linked to investment, or could something else about happier cities 9 why firms there spend more on R&D? To find out, the researchers controlled for various 10 that might make firms more likely to invest – like size, industry, and sales – and for indicators that a place was 11 to live in, like growth in wages or population. The link between happiness and investment generally 12 even after accounting for these things.

The correlation between happiness and investment was particularly strong for younger firms, which the authors 13 to “less codified decision making process” and the possible presence of “younger and less 14 managers who are more likely to be influenced by sentiment.” The relationship was 15 stronger in places where happiness was spread more 16. Firms seem to invest more in places where most people are relatively happy, rather than in places with happiness inequality.

17 this doesn't prove that happiness causes firms to invest more or to take a longer-term view, the authors believe it at least 18 at that possibility. It's not hard to imagine that local culture and sentiment would help 19 how executives think about the future. “It surely seems plausible that happy people would be more forward-thinking and creative and 20 R&D more than the average,” said one researcher.

2017

People have speculated for centuries about a future without work. Today is no different, with academics, writers, and activists once again 1 that technology is replacing human workers. Some imagine that the coming work-free world will be defined by 2: A few wealthy people will own all the capital, and the masses will struggle in an impoverished wasteland.

A different and not mutually exclusive 3 holds that the future will be a wasteland of a different sort, one 4 by purposelessness: Without jobs to give their lives 5, people will simply become lazy and depressed. 6, today's unemployed don't seem to be having a great time.

One Gallup poll found that 20 percent of Americans who have been unemployed for at least a year report having depression, double the rate for 7 Americans. Also, some research suggests that the 8 for rising rates of mortality, mental-health problems, and addiction 9 poorly-educated, middle-aged people is shortage of well-paid jobs. Perhaps this is why many 10 the agonizing dullness of a jobless future.

But it doesn't 11 follow from findings like these that a world without work would be filled with unease. Such visions are based on the 12 of being unemployed in a society built on the concept of employment.

In the 13 of work, a society designed with other ends in mind could 14 strikingly different circumstances for the future of labor and leisure. Today, the 15 of work may be a bit overblown. "Many jobs are boring, degrading, unhealthy, and a waste of human potential," says John Danaher, a lecturer at the National University of Ireland in Galway.

These days, because leisure time is relatively 16 for most workers, people use their free time to counterbalance the intellectual and emotional 17 of their jobs.

"When I come home from a hard day's work, I often feel 18," Danaher says, adding, "In a world in which I don't have to work, I might feel rather different"

—perhaps different enough to throw himself 19 a hobby or a passion project with the intensity usually reserved for 20 matters.

2018

Why do people read negative Internet comments and do other things that will obviously be painful? Because humans have an inherent need to 1 uncertainty, according to a recent study in *Psychological Science*. The new research reveals that the need to know is so strong that people will 2 to satisfy their curiosity even when it is clear the answer will 3.

In a series of four experiments, behavioral scientists at the University of Chicago and the Wisconsin School of Business tested students' willingness to 4 themselves to unpleasant stimuli in an effort to satisfy curiosity. For one 5 each participant was shown a pile of pens that the researcher claimed were from a previous experiment. The twist? Half of the pens would 6 an electric shock when clicked.

Twenty-seven students were told which pens were electrified; another twenty-seven were told only that some were electrified 7 left alone in the room, the students who did not know which ones would shock them clicked more pens and incurred more shocks than the students who knew what would 8. Subsequent experiments reproduced this effect with other stimuli, 9 the sound of fingernails on a chalkboard and photographs of disgusting insects.

The drive to 10 is deeply rooted in humans, much the same as the basic drives for 11 or shelter, says Christopher Hsee of the University of Chicago. Curiosity is often considered a good instinct—it can 12 new scientific advances, for instance—but sometimes such 13 can backfire. The insight that curiosity can drive you to do 14 things is a profound one.

Unhealthy curiosity is possible to 15, however. In a final experiment, participants who were encouraged to 16 how they would feel after viewing an unpleasant picture were less likely to 17 to see such an image. These results suggest that imagining the 18 of following through on one's curiosity ahead of time can help determine 19 it is worth the endeavor. "Thinking about long-term 20 is key to reducing the possible negative effects of curiosity." Hsee says. In other words, don't read online comments.

2019

Weighing yourself regularly is a wonderful way to stay aware of any significant weight fluctuations. 1, when done too often, this habit can sometimes hurt more than it 2.

As for me, weighing myself every day caused me to shift my focus from being generally healthy and physically active to focusing 3 on the scale. That was bad to my overall fitness goals. I had gained weight in the form of muscle mass, but thinking only of 4 the number on the scale, I altered my training program. That conflicted with how I needed to train to 5 my goals.

I also found that weighing myself daily did not provide an accurate 6 of the hard work and progress I was making in the gym. It takes about three weeks to a month to notice any significant changes in your weight 7 altering your training program. The most 8 changes will be observed in skill level, strength and inches lost.

For these 9, I stopped weighing myself every day and switched to a bimonthly weighing schedule 10. Since weight loss is not my goal, it is less important for me to 11 my weight each week. Weighing every other week allows me to observe and 12 any significant weight changes. That tells me whether I need to 13 my training program.

I use my bimonthly weigh-in 14 to get information about my nutrition as well. If my training intensity remains the same, but I'm constantly 15 and dropping weight, this is a 16 that I need to increase my daily caloric intake.

The 17 to stop weighing myself every day has done wonders for my overall health, fitness and well-being. I'm experiencing increased zeal for working out since I no longer carry the burden of a 18 morning weigh-in. I've also experienced greater success in achieving my specific fitness goals, 19 I'm training according to those goals, not the numbers on a scale.

Rather than 20 over the scale, turn your focus to how you look, feel how your clothes fit and your overall energy level.

2020

Being a good parent is, of course, what every parent would like to be. But defining what it means to be a good parent is undoubtedly very __1__, particularly since children respond differently to the same style of parenting. A calm, rule-following child might respond better to a different sort of parenting than, __2__, a younger sibling.

__3__, there's another sort of parent that's a bit easier to __4__: a patient parent. Children of every age benefit from patient parenting. Still, __5__ every parent would like to be patient, this is no easy __6__. Sometimes parents get exhausted and frustrated and are unable to maintain a __7__ and composed style with their kids. I understand this.

You're only human, and sometimes your kids can __8__ you just a little too far. And then the __9__ happens: You lose your patience and either scream at your kids or say something that was a bit too __10__ and does nobody any good. You wish that you could __11__ the clock and start over. We've all been there.

__12__, even though it's common, it's important to keep in mind that in a single moment of fatigue, you can say something to your child that you may __13__ for a long time. This may not only do damage to your relationship with your child but also __14__ your child's self-esteem.

If you consistently lose your __15__ with your kids, then you are inadvertently modeling a lack of emotional control for your kids. We are all becoming increasingly aware of the __16__ of modeling tolerance and patience for the younger generation. This is a skill that will help them all throughout life. In fact, the ability to emotionally regulate or maintain emotional control when __17__ by stress is one of the most important of all life's skills.

Certainly, it's incredibly __18__ to maintain patience at all times with your children. A more practical goal is to try, to the best of your ability, to be as tolerant and composed as you can when faced with __19__ situations involving your children. I can promise you this: As a result of working toward this goal, you and your children

will benefit and __20__ from stressful moments feeling better physically and emotionally.

2021

It's not difficult to set targets for staff. It is much harder, 1, to understand their negative consequences. Most work-related behaviors have multiple components. 2 one and the others become distorted.

Travel on a London bus and you'll 3 see how this works with drivers. Watch people get on and show their tickets. Are they carefully inspected? Never. Do people get on without paying? Of course! Are there inspectors to 4 that people have paid? Possibly, but very few. And people who run for the bus? They are 5. How about jumping lights? Buses do so almost as frequently as cyclists.

Why? Because the target is 6. People complained that buses were late and infrequent. 7, the number of buses and bus lanes were increased, and drivers were 8 or punished according to the time they took. And drivers hit these targets. But they 9 hit cyclists. If the target was changed to 10 you would have more inspectors and more sensitive pricing. If the criterion changed to safety, you would get more 11 drivers who obeyed traffic laws. But both these criteria would be at the expense of time.

There is another 12: people became immensely inventive in hitting targets. Have you 13 that you can leave on a flight an hour late but still arrive on time? Tailwinds? Of course not! Airlines have simply changed the time a 14 is meant to take. A one-hour flight is now billed as a two-hour flight.

The 15 of the story is simple. Most jobs are multidimensional, with multiple criteria. Choose one criterion and you may well 16 others. Everything can be done faster and made cheaper, but there is a 17. Setting targets can and does have unforeseen negative consequences.

This is not an argument against target-setting. But it is an argument for exploring consequences first. All good targets should have multiple criteria 18 critical factors such as time, money, quality and customer feedback. The trick is not only to 19 just one or even two dimensions of the objective, but also to understand how to help people better 20 the objective.
